

## **For Immediate Release**

### **Triumfant Announces Reseller Agreement with Corona Technical Services**

#### *Triumfant Resolution Manager Expands Corona's Offerings to the Endpoint*

**Rockville, MD – March 23, 2009 --** [Triumfant](#)®, creator of patent-pending software that automatically discovers, analyzes and remediates unexpected changes and conditions at the endpoint, today announced that [Corona Technical Services](#), a leading provider of network monitoring software, training and support, signed an agreement to resell the Triumfant Resolution Manager™.

Through this partnership, Corona Technical Services can now offer its customers the Triumfant Resolution Manager to address a wide-range of endpoint security, monitoring and control challenges including compliance and configuration management, and incident and problem management. In addition, Corona Technical Services will be able to provide training and consulting services specific to Triumfant's solution.

“By reselling Triumfant Resolution Manager, we are now able to reach beyond the network and help our customers manage compliance and close gaps at the desktop that cause security breaches.” said Danny George, president, Corona Technical Services. “This agreement significantly broadens the Corona portfolio and enables us to integrate this innovative software into management solutions that address today's network management and security concerns.”

Triumfant Resolution Manager uses its patent-pending analytics to identify and remediate unexpected changes and conditions in the desktop environment. This is accomplished by tracking and analyzing over 200,000 attributes for every computer including registry keys, security settings, port settings, and performance statistics. Triumfant detects changes at the granular level of each machine and determines if these changes are normal to the computer population or an anomalous event. If an anomalous event is detected, Triumfant Resolution Manager automatically synthesizes a surgical remediation to address the issue.

“With Triumfant Resolution Manager, Corona Technical Services can now offer its customers a leading desktop solution to address their incident and problem management and security configuration management requirements,” said Adam Berlew, senior vice president of business development for Triumfant. “Corona has a proven record of sales and training success and we have complete confidence it will enable its customers to realize the full value of Triumfant Resolution Manager. This relationship extends Triumfant's reach into the enterprise and provides Corona with capabilities unavailable from any other solution on the market today.”

### **About Corona Technical Services**

Corona Technical Services, a Tulsa-based company, is a charter provider of training for SolarWinds products and has been training internationally since 2005. Additionally, the company provides onsite

consulting services, software and maintenance sales, and customized development for its customers. Contact the company at 918-398-8052 or via the web at [www.coronaservices.net](http://www.coronaservices.net).

### **About Triumfant**

Triumfant® leverages a one-of-a-kind ability to discover, diagnose and repair unwanted changes to endpoint computers and servers to create compelling solutions for endpoint security, compliance and configuration management, and incident and problem management. These solutions, powered by the Triumfant Resolution Manager™ platform, enable businesses and government agencies to reduce IT support costs, minimize security risks, enforce continuous compliance and increase quality of service.
