

Triumfant Welcomes Former DHS Assistant Secretary for Cyber Security and Communications to Advisory Board

Gregory Garcia Brings Deep Understanding of the Technologies and Policies that Shape Cyber Security

Rockville, MD – August 12, 2009 – Triumfant®, creator of patent-pending software that automatically detects, analyzes and remediates unexpected changes and conditions at the endpoint, today announced the addition of Gregory (Greg) T. Garcia, former Assistant Secretary for Cyber Security and Communications (CS&C) for the U.S. Department of Homeland Security (DHS), to its Advisory Board. The Advisory Board provides the Triumfant executive team with valuable insights to ensure that Triumfant is best positioned to meet the needs of the company's target markets and deliver solutions that provide real, incremental value for endpoint security.

“Greg’s commitment to securing our nation’s information infrastructure has brought about fundamental change on how both the private and public sectors take proactive steps to protect their networks,” stated John Prisco, CEO, Triumfant. “With his deep understanding of technology and the policies that shape cyber security, he is a great asset to Triumfant and we look forward to using his expertise to build and deliver solutions that address endpoint security by providing real-time malware detection and remediation.”

Currently, Garcia is president of Garcia Strategies, LLC, a strategic business and government affairs advisory services firm representing large and small companies that contribute to the nation’s cyber security mission. Prior to starting his own firm, Garcia served as the nation’s first presidentially-appointed Assistant Secretary for CS&C at DHS from 2006-2008. While there, he led the strategic direction of CS&C, overseeing a \$500 million budget for the National Cyber Security Division, the Office of Emergency Communications and the National Communications System. His accomplishments included the establishment of the Office of Emergency Communications, which drove interoperable emergency communications for federal, state and local first responders and enhanced the availability, resiliency and priority service of communications for national security and emergency preparedness needs. In addition, Garcia worked to integrate the nation’s overall cyber and communications security strategy to align with the evolving architecture and risk profile of our national information infrastructure.

Prior to DHS, Garcia served as vice president for Information Security Programs and Policy at the Information Technology Association of America (ITAA) where he worked with DHS to help create the National Cyber Security Partnership. He has also served as a Congressional staff member of the House Committee of Science and Technology where he played a lead role in drafting and shepherding the enactment of the Cyber Security Research and Development Act of 2002. Prior to his service on Capitol Hill, Garcia contributed to national policy development through several private sector organizations which included his role as director of 3Com Corporation’s Global Government Relations Office.

About Triumfant

Triumfant® leverages a one-of-a-kind ability to discover, diagnose and repair unwanted changes to endpoint computers and servers to create compelling solutions for endpoint security, compliance and configuration management, and incident and problem management. These solutions, powered by the Triumfant Resolution Manager™ platform, enable businesses and government agencies to reduce IT

support costs, minimize security risks, enforce continuous compliance and increase quality of service. For more information, visit www.triumfant.com.

Triumfant, Triumfant Resolution Manager and the Triumfant logo are the exclusive properties of Triumfant, Inc. and are registered with the U.S. Patent and Trademark Office.
